NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***I. BUSINESS HIGHLIGHTS****1. Establishment**

Saigon Telecommunication & Technologies Corporation is incorporated and operates under Business Registration Certificate No. 0302615063 dated May 14, 2002 (the 17th amendment dated September 30, 2024) issued by the Department of Planning and Investment of Ho Chi Minh City, updating legal documents according the legal representative.

Structure of ownership

Joint Stock Company.

English name: SAIGON TELECOMMUNICATION & TECHNOLOGIES CORPORATION

Short name: SAIGONTEL CORP

Listing code: SGT (Listed and traded at HOSE - Hochiminh Stock Exchange)

Headquarters: Lot 46, Quang Trung Software Park, Trung My Tay Ward, Ho Chi Minh City, Vietnam.

2. Business sector

Business sector include trade, services, construction, and business in many different fields.

3. The Company's principal business activities

The Company's principal activities include:

- Wholesaling electronic, telecom equipment and spare parts, in particular: Trading electric-electronic equipment; Trading materials, transmission equipment, terminator, protection equipment for IT; Trading telephone card, internet card;

The Company's regular activities include:

- Wholesaling computers, peripheral equipment and software, in particular: Trading computers, software;
- Repairing computers and peripheral equipment, in particular: Installing, repairing, maintaining computers (except for mechanics, waste recycling, electroplating);
- Rendering IT service and other services related to computers, in particular: Technological constancy on informatics; Designing, installing network infrastructures;
- Other telecom activities, in particular: Providing with value added services on internet: data and information access service on internet, data handling service, electronic data exchanging service (except for internet access service at the head office) (without internet infrastructures); Acting as internet service agent (not at the head office) (without internet infrastructures); Acting as telecom postal service agent (without internet infrastructures);
- Trading real estates, right to use land which belongs to owner, user or leased, in particular: Trading real estates (except for brokerage, valuation, real estates transaction center); Trading infrastructures in industrial parks; Trading industrial park, urban residential area, informatics technological zone;
- Building other civil technological works, in particular: Building industrial, civil, traffic works, road and bridge, irrigational and electrical works up to 35KV; Investing in infrastructures of industrial parks; Building industrial park, urban residential area, informatics technological zone;
- Wholesaling machinery, equipment and other spare parts, in particular: Trading machinery and equipment for telecom;
- Exploiting, treating and providing with water (not at the head office);
- Producing, transmitting and distributing power, in particular: Producing, transmitting power (not at the head office);
- Information gate; Details: Setting up consolidated electronic information page;
- Repairing electrical equipment (except for mechanical processing, wastes recycling, electroplating at the head office);
- Installing electricity system (except for mechanical processing, wastes recycling, electroplating at the head office);
- Organizing introduction and trading promotion, in particular: Organizing trade introduction and promotion; organizing events, fairs, exhibitions, conferences, seminars, festivals (do not perform fire or explosion effects; do not use explosives, flammable substances, chemicals as props or tools to perform the art shows, events, movies).
- Advertisement;
- Doing market research and public opinion poll;

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***4. Normal operating cycle**

Normal operating cycle of the Company lasts 12 months of the normal fiscal year beginning from January 01 and ending on December 31.

For project business activities, the business cycle lasts over 12 months.

5. Operations in the fiscal year affecting the consolidated financial statements

Not applicable.

6. Total employees to June 30, 2025: 237 employees. (December 31, 2024: 227 employees).**7. Enterprise structure****7.1. Number of subsidiaries**

- Number of subsidiaries under consolidation: seven (07) subsidiaries.

- Number of subsidiaries not under consolidation: None.

As at June 30, 2025, the Company had seven (07) owned subsidiaries consolidated:

<i>Name of Company</i>	<i>Principal activities</i>	<i>Paid-in capital</i>	<i>% of ownership</i>	<i>% of voting right</i>
1. Saigontel Real Estates Investment JSC	Wholesaling and manufacturing electronic and telecom equipment and components; Trading real estates, right to use land being owned, used or leased	35.000.000.000	70.0%	70.0%

8. Disclosure on comparability of information in the consolidated Financial Statements

The selection of figures and information needed to be presented in the consolidated financial statements has been implemented on the principles of comparability among corresponding accounting periods.

II. ACCOUNTING PERIOD AND REPORTING CURRENCY**1. Fiscal year**

The fiscal year is begun on January 01 and ended December 31 annually.

2. Reporting currency

Vietnam Dong (VND) is used as a currency unit for accounting records.

III. ADOPTION OF ACCOUNTING STANDARDS AND POLICIES**1. Applicable Accounting System**

The Company applies Vietnamese Corporate Accounting System in accordance with the guidance of Circular No. 200/2014/TT-BTC dated December 22, 2014 and amended, supplemented circulars and Circular No. 202/2014/TT-BTC issued by Vietnam Ministry of Finance on the same date on guiding the method of preparing and presenting the consolidated financial statements.

2. Disclosure of compliance with Vietnamese Accounting Standards and the Vietnamese Accounting System

We conducted our accounting, preparation and presentation of the consolidated financial statements in accordance with Vietnamese Accounting Standards, Corporate Accounting System and other relevant statutory regulations. The consolidated financial statements give a true and fair view of the state of affairs of the Company and the results of its operations as well as its cash flows.

The selection of figures and information presented in the notes to the financial statements is complied with the material principles in Vietnamese Accounting Standard No.21 - Presentation of the financial statements and Vietnamese Accounting Standard No.25 "Consolidated financial statements and accounting for investment in subsidiaries".

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***IV. APPLICABLE ACCOUNTING POLICIES****1. Basis of consolidation**

The consolidated financial statements are prepared on the basis of accrual accounting (except for information related to cash flows).

The consolidated financial statements comprise of the financial statements of Saigon Telecommunication & Technologies Corporation and its subsidiaries ("the Company") for the fiscal year ended March 31, 2025.

The financial statements of the subsidiaries are consolidated from the purchase date when the Company starts control to the date it ceases the control.

The subsidiaries' financial statements are prepared for the same accounting period as Saigon Telecommunication & Technologies Corporation's under the accounting policies in consistency with Saigon Telecommunication and Technologies Corporation's. The adjustments for any different accounting policies are implemented to ensure the consistency between the Subsidiaries and Saigon Telecommunication & Technologies Corporation.

All inter-company's balances and revenue, income, expenses incurred from transactions of the Group, including unrealized gains incurred from inter-company transactions in the assets' value are completely eliminated.

Unrealized loss incurred from intra-group transactions recorded in the assets' value are eliminated when the expenses resulting in the loss are unrecoverable.

Interest of non-controlling shareholders represents the portion in gain or loss and net assets of the subsidiaries that are not held by the Company and presented separately in the consolidated Income Statement and from shareholders' equity of the Company in the owners' equity in the consolidated Balance Sheet.

2. Transactions in foreign currency

Transactions arising in foreign currencies are converted at the exchange rate at the date of the transaction. The balance of monetary items denominated in foreign currencies at the end of the fiscal year is converted at the exchange rate on that date.

Exchange rate differences arising during the year from transactions in foreign currencies are recorded in financial income or financial expenses. Exchange rate differences due to the revaluation of monetary items denominated in foreign currencies at the end of the fiscal year after offsetting the increase and decrease difference are recorded in financial income or financial expenses.

Principles for determining exchange rates for arising transactions

The exchange rate used to convert transactions arising in foreign currency is the actual exchange rate at the time the transaction occurred. Actual exchange rates for transactions in foreign currencies are determined as follows:

Actual exchange rate when foreign currency trading (spot foreign currency contracts, forward contracts, futures contracts, options contracts, swap contracts): the exchange rate signed in the foreign currency purchase/sale contract between the Company and the bank.

For receivables: the buying rate of the commercial bank where the Company designates the customer to make payment at the time the transaction occurs.

For payables: the selling rate of the commercial bank where the Company plans to transact at the time the transaction occurs.

For asset purchases or expenses transactions paid immediately in foreign currency (not through accounts payable): the buying rate of the commercial bank where the Company makes the payment.

Principles for determining exchange rates at the end of the fiscal year

The ending balance of monetary items (cash, cash equivalents, receivables and payables, except for items of prepayments to suppliers, advances from customers, prepaid expenses, deposits and prepaid revenues) denominated in foreign currencies are revalued at the actual transaction exchange rate announced at the time of preparing the financial statements:

Actual transaction exchange rate when revaluing foreign currency items classified as assets: applied according to the foreign currency buying rate of Military Commercial Joint Stock Bank. Conversion buying rate as at June 30, 2025: VND 25,925/USD.

Actual transaction exchange rate when revaluing foreign currency items classified as liabilities: applied according to the foreign currency selling rate of Military Commercial Joint Stock Bank. Converted selling rate as at June 30, 2025: VND 26,285/USD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***Principles for determining accounting exchange rates**

When collecting receivables, deposits, collateral or paying payables in foreign currency, the Company uses the actual book exchange rate.

When making payments in foreign currencies, the Company uses the moving weighted average book exchange rate.

3. Principle of determining the real interest rate (effective interest rate) used to discount cash flows

The actual interest rate (effective interest rate) used to discount cash flows for items recorded at present value, amortization value, recovery value, etc. is the interest rate of commercial banks that are commonly applied in the market at the time of the transaction/that the Company can borrow in the form of issuing debt instruments without the right to convert into shares under normal operating and business conditions.

4. Principles of recording cash and cash equivalents

Cash includes cash on hand, term and non-term bank deposits, money in transit, and monetary gold.

Cash equivalents are short-term investments with a maturity of three months or less from the date of purchase, which are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

5. Principles of accounting for financial investments**Trading securities**

An investment is classified as a trading security when it is held for the purpose of trading for profit.

Trading securities are recorded in the accounting books at cost. The cost of trading securities is determined based on the fair value of the payments at the time the transaction occurs plus the costs related to the purchase of trading securities.

The time of recording trading securities is the time when the investor has ownership, specifically as follows:

- Unlisted securities are recorded at the time of official ownership as prescribed by law.

Interest, dividends and profits of periods prior to the purchase of trading securities are recorded as a reduction in the value of the trading securities themselves. Interest, dividends and profits of periods subsequent to the purchase of trading securities are recorded as revenue. Dividends received in shares are only tracked by the number of shares increased, not recorded as the value of shares received/recorded at par value (except for state-owned enterprises in accordance with current regulations of law - only for updating with state-owned enterprises).

Provision for devaluation of trading securities is made for each type of securities traded on the market and whose market price is lower than the original price. When determining the fair value of trading securities listed on the stock market or traded on the UPCOM, the fair value of the securities is the closing price at the end of the fiscal year. In case the stock market or UPCOM is not trading at the end of the fiscal year, the fair value of the securities is the closing price of the previous trading session adjacent to the end of the fiscal year.

Increase or decrease in the provision for devaluation of trading securities required to be set up at the end of the fiscal year is recorded in financial expenses.

Held-to-maturity investments

An investment is classified as held-to-maturity when the Company has the intention and ability to hold it until maturity.

Held-to-maturity investments include: term bank deposits (including treasury bills and promissory notes), bonds and other held-to-maturity investments.

Held-to-maturity investments are initially recognised at cost, which includes the purchase price and any costs associated with the transaction. After initial recognition, these investments are recognised at their recoverable amount. Interest income from investments held to maturity after the acquisition date is recognised in the Income Statement on an accrual basis. Interest earned before the Company holds the investment is deducted from the cost at the acquisition date.

When there is strong evidence that part or all of an investment may not be recovered and the amount of loss can be reliably determined, the loss is recorded in financial expenses in the period and the investment value is directly deducted.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***Loans**

Loans are measured at cost less allowance for doubtful debts. Provision for doubtful debts on loans is made based on the expected level of loss that may occur.

Investments in associates

Investments in associates are recorded when the Company holds from 20% to less than 50% of the voting rights of the investee companies, has significant influence, but does not control, in the financial and operating policy decisions of these companies. Investments in associates are reflected in the consolidated financial statements under the equity method.

Under the equity method, capital contributions are initially recorded at cost and then adjusted for post-acquisition changes in the contributor's share of the associate's net assets. The consolidated income statement reflects the Company's share of the associate's post-acquisition results of operations as a separate item.

Goodwill arising from investments in associates is included in the carrying amount of the investment. The Company does not amortize this goodwill but assesses it annually for impairment.

The financial statements of the associate are prepared for the same reporting year as the Company and using consistent accounting policies. Where necessary, consolidation adjustments have been made to ensure consistency with the Company's accounting policies.

Investments in equity of other entities

An investment in other entity is an investment by the Company in the equity instruments of another entity but does not have control or joint control, and does not have significant influence over the investee.

Investments are recorded at cost, including purchase price and costs directly attributable to the investment. In the case of investments in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of acquisition.

For investments that the Company holds for a long term (not classified as trading securities) and does not have significant influence over the investee, the provision for losses is made as follows:

- + Investment in listed shares or fair value of investment is reliably determined, the provision is made based on market value of shares.
- + For investments whose fair value cannot be determined at the reporting date, the provision is made based on the loss of the investee. The basis for setting up the provision for decline in the value of investments in other entities is the financial statement of the invested company.

6. Principles for recording trade receivables and other receivables

Receivables are presented at book value less provisions for doubtful debts.

The classification of receivables is done according to the following principles:

- **Receivables from customers** reflect commercial receivables arising from buying and selling transactions between the Company and the buyer who is an independent unit of the Company, including receivables from sales of export goods entrusted to other units.
- **Intercompany receivables** reflect receivables from affiliated units without legal status and dependent accounting.
- **Other receivables** reflect non-commercial receivables, not related to purchase and sale transactions.

Provision for doubtful debts is made for each doubtful debt based on the overdue age of the debts or the expected level of loss that may occur, specifically as follows:

- For overdue receivables: The Company estimates the the loss in value and is inherently difficult to recover, and makes a provision according to prevailing regulations.
- For receivables that are not overdue but are unlikely to be recovered: base on the expected level of loss to set up provisions.

Increases and decreases in provisions for doubtful debts, balances that need to be made at the end of the fiscal year are recorded in general & administration expenses.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***7. Principles for recording inventories**

Inventories are stated at the lower of cost and net realisable value of inventories.

Original costs are determined as follows:

- **Merchandises:** consists of costs of purchase and other costs incurred in bringing the inventories to their present location and condition.
- **Work in progress:** costs of land use, direct costs and general costs incurred in the duration of building industrial park.

Method of calculating inventories' value: weighted average.

Method of accounting for the inventories: perpetual method.

Method of making provision for decline in value of inventories: Provision for decline in value of inventories is made for each inventory with the cost greater than the net realisable value. Net realisable value is estimated selling price of inventories in the ordinary course of business less (-) estimated costs of completion and estimated costs necessary to sell them. (For services provided in progress, provision for decline in value of inventories is calculated according to each type of service with a separate price.)

Increases and decreases of provision for decline in value of inventories balances that need to be made at the end of the fiscal year are recorded in the cost of goods sold.

8. Principles for recording fixed assets**8.1. Principles for recording tangible fixed assets**

Tangible fixed assets are recorded at cost less (-) accumulated depreciation. Historical cost is all the costs that a business must spend to acquire a fixed asset up to the time the asset is put into a ready-to-use state as expected. The costs incurred after the initial recognition of tangible fixed assets shall be recorded as increase in their historical cost if these costs are certain to augment future economic benefits obtained from the use of these assets. Those incurred costs which fail to meet this requirement must be recognised as production and business expenses in the period.

When the assets are sold or disposed, their original costs and the accumulated depreciation which have been written off and any gain or loss from disposal of assets are recorded in the income statement.

Determination of historical cost on a case-by-case basis

Procured tangible fixed assets

The historical cost of a procured tangible fixed asset consists of the buying price (minus (-) trade discounts and price reductions), taxes (excluding reimbursed tax amounts) and expenses directly related to the putting of the assets into the ready-for-use state, such as installation and trial operation expense; expert cost and other directly-related expenses.

Where procured tangible fixed assets are houses, architectural objects associated with the land use right, the land use right value must be separately determined and recognised as intangible fixed asset.

Self-constructed or self-made tangible fixed assets

The historical cost of a self-constructed or self-made tangible fixed asset is its actual cost plus (+) the installation and trial operation cost. Where the enterprises turn the products made by themselves into fixed assets, the historical costs shall be the production costs of such products plus (+) the expenses directly related to the putting of the fixed assets into the ready-for-use state. In these cases, all internal profits must not be included in the historical cost of these assets.

8.2. Principles for recording intangible fixed assets

Intangible fixed assets are recorded at cost less (-) accumulated depreciation. The historical cost of intangible fixed assets includes all costs that the Company must spend to acquire the fixed asset up to when the asset is put into a ready-to-use state. Costs related to intangible fixed assets that arise after initial recognition are recorded as production and business costs in the period unless these costs are associated with a specific intangible fixed asset and increase the economic benefits from these assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND*

When intangible fixed assets are sold or liquidated, their original cost and accumulated depreciation are written off and profits and losses arising from disposal are recorded in income or expenses during the year.

Determination of historical cost on a case-by-case basis

Computer software

Costs related to computer software programs that are not an integral part of the related hardware are capitalised. The original price of computer software is all expenses that the Company has spent up to the time the software is put into use.

8.3. Fixed asset depreciation method

Depreciation is charged to write off the cost of fixed assets on a straight line basis over their estimated useful lives. Useful life means the duration in which the tangible fixed assets produce their effect on production and business.

The estimated useful life for assets is as follows:

<i>Buildings and structures</i>	<i>05 - 25 years</i>
<i>Machinery and equipment</i>	<i>05 years</i>
<i>Transportation and facilities</i>	<i>03 - 15 years</i>
<i>Office equipment</i>	<i>04 - 05 years</i>
<i>Other tangible fixed assets</i>	<i>05 years</i>
<i>Computer software</i>	<i>05 years</i>

9. Principles for recording construction in progress

Construction in progress reflects directly related costs (including interest expenses) related in accordance with the Company's accounting policy to assets under construction, machinery and equipment being installed for production, leasing and management purposes as well as costs related to repairs of fixed assets in progress. These assets are recorded at original cost and are not depreciated.

This cost is transferred to increase assets when the project is completed, the overall acceptance is completed, the assets are handed over and put into ready-to-use state.

10. Principles for recording and depreciating investment properties

Principles for recording investment property: Investment property is the right to use land, a house, a part of a house or infrastructure owned by the Company or financial leasing is used to earn profit from leasing or waiting for price increases. Investment property is stated at cost less accumulated depreciation.

The historical cost of investment property: is all expenses that the Company has to spend or the fair value of the amounts given in exchange for acquiring investment property up to the time of purchase or completion of construction of that investment property.

Expenditures incurred after the initial recognition are recorded as expenses in the period, except for the case where it can be clearly demonstrated that the expenditures have resulted in future economic benefits in excess of the originally assessed standard of performance of the existing investment property, the expenditures are capitalised as an additional cost of investment property.

When investment properties are sold, the original cost and accumulated depreciation are written off and any gain or loss resulting from the sales of these properties will be recorded into the income statement in the period.

The conversion from owner-occupied property or inventory to investment property is only when the owner stops using the asset and begins leasing it to another party or at the end of the construction period. The transfer from investment property to owner-occupied property or inventory occurs only when the owner begins to use the property or begins to develop it for sale. The transfer from investment property to owner-occupied property or inventory does not change the original cost or residual value of the property at the date of conversion.

Investment property used for rental: depreciation is recorded using the straight-line method over the estimated useful life of the investment property.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND****Estimated useful life of investment properties:****Factories**10 years**Land use rights**44 years*

The investment properties awaiting price increases do not make depreciation. In case where there is reliable evidence showing that the investment properties have devalued in comparison with the market value and the devaluated amount has been reliably determined, then the Company will evaluate the decrease of the investment property's original cost and record the loss in cost of goods sold.

11. Principles of accounting for business cooperation contract (BCC)

The Company initially records amounts contributed to BCC at the original cost and reflects them as other receivables.

The Company records receipt to BCC at historical cost and reflects as other liabilities, not in owners' equity.

11.1. BCC in form of jointly controlled assets

Jointly controlled assets of the joint venture parties are assets purchased, constructed, used for the joint venture purposes by the joint venture parties and bringing benefits to the joint venture parties according to the provisions of the Joint Venture Contract. The joint venture parties receive products/ (or revenue) from the use and exploitation of the jointly controlled assets and bear a part of the costs incurred according to the agreement in the contract.

The Company records its share of the value of jointly controlled assets as assets on the Financial Statements.

For fixed assets and investment properties when contributed as capital to BCC and ownership is not transferred from the capital contributor to the joint ownership of the parties, the Company does not record a decrease in assets on the financial statements but only monitors in detail the location, position, and place where the assets are located.

11.2. BCC in form of jointly controlled operations

A business cooperation contract in the form of a jointly controlled operation is a joint venture that does not establish a new business entity. The joint venture parties have obligations and enjoy benefits according to the agreement in the contract. The activities of the joint venture contract are carried out by the capital contributors together with other normal business activities of each party.

When receiving money or assets contributed by other parties to BCC activities, the Company records them as liabilities and does not record them in equity. The difference between the fair value of the returned assets and the value of the contributions received from the parties is reflected as other income or other expenses.

The principles of revenue, cost and product division of the contract are based on the agreements in the joint venture contract on the allocation of common costs and product division regulations confirmed by the joint venture parties.

If receiving capital contribution in the form of fixed assets or investment real estate without transferring ownership, the Company only monitors the details on the management system and explains as assets held in trust.

11.3. BCC profit sharing

If the BCC stipulates that other parties participating in the BCC are entitled to a fixed profit, the Company shall recognize the entire revenue, expenses, and profit after tax of the BCC on the Income Statement; Recognize the entire profit after tax of the BCC in the "Retained Earnings" item on the Balance Sheet.

If the BCC stipulates that other parties within the BCC are only entitled to profit distribution if the BCC's operations result in a profit, and they also bear losses, the Company shall apply the revenue-sharing BCC accounting method to recognize revenue, expenses, and business results corresponding to the portion allocated according to the BCC agreement.

12. Principles of recording prepaid expenses

Prepaid expenses at the Company include actual expenses that have been incurred but are related to the business performance of many accounting periods. Method of allocating prepaid expenses: Calculating and allocating prepaid expenses into business operating expenses for each period is done using the straight-line method.

The company's prepaid expenses include the following:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND*

Tools and supplies: Tools and supplies that have been put into use are allocated to expenses using the straight-line basis with an allocation period not exceeding 36 months.

Insurance costs: (fire and explosion insurance, vehicle owner civil liability insurance, vehicle body insurance, property insurance,...) and other fees that The Company buy and pay once for many accounting periods

Fixed asset repair costs: One-time asset repair costs of great value are allocated to expenses using the straight-line basis with an allocation period during 36 months.

Other prepaid expenses serve business operations for many accounting periods.

13. Principles for recording liabilities

Liabilities are recognised for amounts to be paid in the future for goods and services received. Liabilities are recognised based on reasonable estimates of the amount payable.

The classification of payables as payables to vendors, internal payables and other payables is based on the following principles:

- Payables to vendors reflect trade payables arising from purchases of goods, services, assets and the vendor is an independent unit of the Company, including payables when Imported through consignee.
- Internal payables reflect payables between superior units and subordinate units without legal status and dependent accounting.
- Other payables reflect non-commercial payables, not related to transactions of buying, selling or providing goods and services.

14. Principles for recording borrowings and finance lease liabilities

Borrowings are total amounts the Company owes to banks, institutions, financial companies and other objects (excluding borrowings under the form of bond or preferred stock issuance which require the issuer to repurchase at a certain time in the future).

Financial lease liabilities are recorded as total payable amount calculated by present value of minimum lease payment amounts or fair value of leased assets.

Borrowings and financial lease liabilities are monitored in detail according to creditor, agreement and borrowed asset.

15. Principles for recording and capitalising borrowing costs

Principles for recording borrowing costs: Borrowing costs include loan interest and other costs incurred directly related to loans. Borrowing costs are recorded as expenses when incurred.

In cases where borrowing costs are directly related to construction investment or production of unfinished assets that need a long enough period (over 12 months) to be put into use for the intended purpose or sold, then these borrowing costs are capitalised. For separate borrowings serving the construction of fixed assets or investment properties, interest is capitalised even if the construction period is less than 12 months. Income arising from the temporary investment of loans is recorded as a decrease in the cost of the relevant assets.

For general borrowings capital, which is used for construction investment purposes or production of unfinished assets, capitalised borrowing costs are determined according to the capitalisation rate for the weighted average accumulated costs incurred for capital construction investment or production of that asset. The capitalisation rate is calculated according to the weighted average interest rate of outstanding borrowings during the year, excluding separate loans serving the purpose of creating a specific asset.

16. Principles for recording accrued expenses

Accrued expenses reflect amounts payable for goods and services received from the seller or provided to the buyer but not yet paid due to lack of invoices or insufficient records, accounting documents and other relevant documents, payables to employees in terms of vacation wages, production and business expenses that must be accrued in advance.

Land lease: Accrued expenses are recorded on the basis of the fair estimates on amounts payable to goods, services which have been used and the fair estimates on the costs of land leasing activity in the year. The costs of land leasing activity are calculated based on the fair estimates on the amounts payable to goods, services for the purpose of this activity in the year:

$$\begin{array}{l} \text{Costs of land leasing} \\ \text{activity} \end{array} = \begin{array}{l} \text{Lease area in the} \\ \text{period} \end{array} \times \begin{array}{l} \text{Costs/1m2 of lease land as per investment} \\ \text{estimates} \end{array}$$

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***17. Principles for recoding unrealised revenue**

Unrealised revenue is the revenue which will be recorded in correspondence with the obligations that the Company must perform in one or more following accounting periods.

Unrealised revenue includes the prepaid amount from customers for one or many accounting periods concerning the lease of property at Saigontel Tower, Lot 46 Quang Trung Software Park, Tan Chanh Hiep Ward, Dist. 12, HCMC and the lease of plant at Dai Dong Hoan Son IP, Bac Ninh Province.

Method of allocating unrealised revenue is on the principle of conformity with obligations that the Company will perform in next one or several accounting periods.

18. Principles for recording owner's equity**Paid-in capital**

Paid-in capital is recognised according to the actual contributed capital of shareholders.

Share premium: Share premium is recognised according to the difference between the issue price and the par value of shares at initial issuance, additional issuance, the difference between the reissue price and the book value of treasury shares and the capital component of convertible bonds at maturity. Direct costs related to the additional issuance of shares and the reissue of treasury shares are credited to the share capital surplus.

Principles for recording undistributed earnings

Profit after corporate income tax shall be distributed to shareholders after setting aside funds in accordance with the Charter of the Company as well as the provisions of law and approved by the General Meeting of Shareholders' Council.

The distribution of profits to shareholders taking into consideration non-monetary items included in undistributed after corporate income tax may affect cash flow and the ability to pay dividends such as interest due to revaluation of assets contributed to capital, interest due to revaluation of monetary items, financial instruments and other non-monetary items.

Dividends are recognised as liabilities when approved by the General Meeting of Shareholders' Council.

19. Principles for recording treasury shares

Upon redemption of shares issued by the Company, the amount paid including transaction-related expenses is recorded as treasury shares and reflected as a deduction in equity. When reissued, the difference between the reissue price and the book price of treasury shares is recorded in the item "Share premium".

20. Principles for recording revenues and other income**Revenue from the transfer of land, leasing of land with developed infrastructure, and leasing of office buildings and factories**

The Company applies the method of recording revenue once for all advanced amounts before the following conditions are met simultaneously: 1. The lessee is not entitled to cancel the lease contract and the lessor has no obligation to repay the amount received in advance in all cases and in all forms; 2. The amount received in advance from the lease is not less than 90% of the total lease amount expected to get under the contract during the lease term and the lessee must pay the entire amount of lease within 12 months from the beginning of the lease; 3. Almost all the risks and benefits associated with ownership of the leased asset are transferred to the lease; 4. The lessor must estimate relatively the full cost of the lease.

Revenue from goods sold

Revenue from the sale of goods should be recognised when all the five (5) following conditions have been satisfied: 1. The enterprise has transferred to buyer the significant risks and rewards of ownership of the goods; 2. The enterprise retains neither continuing managerial involvement as an owner nor effective control over the goods sold; 3. The amount of revenue can be measured reliably; When the contract specifies that buyers are entitled to return products, goods they have bought under specific conditions, the enterprise will record the revenue only when those conditions no longer exist and the buyers do not have right to return products, goods (except for changing to other goods, services) 4. The economic benefits associated with the transaction has flown or will flow to the enterprise; 5. The costs incurred or to be incurred in respect of the transaction can be measured reliably.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND***Revenue from service rendered**

Revenue of a transaction involving the rendering of services is recognised when the outcome of that transaction can be determined reliably. In case the service is performed in many periods, the revenue recognised in the period is based on the results of the work completed at the end of the accounting period.

The results from transaction involving the rendering of services are determined when all four (4) conditions are satisfied:

1. Revenue can be determined with relative certainty. When the contract stipulates that the buyer is entitled to return the purchased services under specific conditions, revenue is recognised only when those specific conditions no longer exist and the buyer is not entitled to return the purchased services;
2. Economic benefits from the transaction providing that service can be obtained;
3. The work completed at the end of the accounting period can be determined;
4. The costs incurred for the transaction and the costs to complete the transaction involving the rendering of services can be determined.

Financial income

Revenue from financial activities is recognised when all the two (2) following conditions have been satisfied: 1. It is possible to obtain economic benefits from the concerned transactions; 2. Income is determined with relative certainty.

Revenue from financial activities includes: interest, dividends, shared profits and revenue from other financial activities of the Company (investment in stock trading, investment in affiliated companies, subsidiaries, investments in other capital investment; exchange rate interest)...

Interests recognised on an accrual basis, determined on the balance of deposit accounts and interest rates in each period;

Distributed dividends and profits shall be recognised when shareholders are entitled to receive dividends or profits from the capital contribution. Dividends received in shares are only tracked by the number of additional shares, the value of shares received/recorded at par value is not recorded.

When an amount which has been recorded as an income becomes irrecoverable, such irrecoverable or uncertainly recoverable amount must be accounted as expense incurred in the period, but not recorded as income decrease.

21. Principles and method of recording cost of goods sold

Cost of goods sold are the cost of products, goods, services, production costs and other expenses recorded in the cost of goods sold or recorded a decrease in the cost of goods sold in reporting period. The cost of goods sold is recorded at the date the transaction incurs or likely to incur in the future regardless payment has been made or not. The cost of goods sold and revenue shall be recorded simultaneously on conformity principles. Expenses exceeding normal consumption level are recorded immediately to the cost of goods sold on prudent principle.

22. Principles and method of recording financial expenses

Financial expenses include expenses or loss related to the financial investment, borrowing cost and capital borrowing, cost of capital contribution to joint ventures and associations, short-term securities transfer losses, transaction costs for selling securities.; Provision for devaluation of financial investments, losses incurred when selling foreign currencies, exchange rate losses and other financial expenses.

Financial expenses are recorded in details by their content and determined reliably when there are sufficient evidences on these expenses.

23. Principles and methods of recording current and deferred corporate income tax expenses

Corporate income tax includes current corporate income tax and deferred corporate income tax incurred in the year and set basis for determining operating result after tax in current fiscal year.

Current income tax is a tax calculated based on taxable income. Taxable income differs from accounting profit due to adjustment of temporary differences between tax and accounting, non-deductible expenses as well as adjustment of non-taxable income and loss carried forward.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*For the accounting period ended June 30, 2025**Unit: VND*

Deferred income tax is the corporate income tax that will be payable or refunded due to the temporary difference between the book value of assets and liabilities to prepare financial statements and the basis for calculating income tax. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised only when it is probable that taxable profits will be available in the future against which these deductible temporary differences can be utilized.

The book value of deferred tax assets is reconsidered at the end of the financial year and is reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or the entire deferred tax asset to be used. Previously unrecognised deferred corporate income tax assets are reassessed at the end of the financial year and are recognised to the extent that it is probable that sufficient taxable profit will be available against which the income tax assets can be utilized.

Tax rates of deferred income tax assets and deferred income tax liabilities are determined at the tax rates expected to apply in the year the asset is realized or the liability is paid based on the tax rates in effect at the end of the fiscal year. Deferred income tax is recorded in the income statement and recorded directly in equity only when the tax relates to items recorded directly in equity.

The Company offsets deferred tax assets and deferred tax liabilities when it has a legally enforceable right to set off current tax assets against current tax liabilities; and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority; on the same taxable entity; or the Company intends to settle its current tax liabilities and current tax assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of the deferred tax liabilities or deferred tax assets are expected to be settled or recovered.

Taxes and other payables to the State Budget will be finalized with the tax office. Differences between the tax amounts payable specified in the book and the tax amounts under finalization will be adjusted when the tax finalization has been issued by the tax office.

Tax policies the Company should comply with are as follows:

Bac Ninh Branch

The branch has chosen the method of determining revenue as the total amount of money the lessee has paid in advance for many years, so according to the provisions of Section h, Point 3, Section II, Part B of Circular No. 134/2007/TT-BTC dated November 23, 2007, the taxable income exempted from tax or reduced is equal to ($=$) the total taxable income divided ($:$) by the number of years the lessee has paid in advance multiplied (\times) by the number of years exempted from tax or reduced.

For infrastructure business activities, in previous years, the Branch calculated corporate income tax based on total taxable income recorded by the method of determining revenue as the total amount of money paid in advance by the lessee for many years. From 2012, based on the Tax Finalization Minutes at the Branch signed on December 14, 2012, the Branch calculated current corporate income tax based on taxable income allocated to the number of years of prepayment.

- Corporate income tax expense of the remaining years (the difference between the current year's corporate income tax expense and the tax expense calculated on the total taxable income recorded under the revenue determination method is the total amount paid by the lessee in advance for many years) is accounted for in the current year's deferred corporate income tax expense.
- Corporate income tax payable for infrastructure business activities from 2009 to 2011 is also calculated based on taxable income allocated to the number of years of prepayment and is recorded in the deferred corporate income tax payable account.

24. Principles for recording earnings per share

Basic earnings per share is calculated by dividing net income available to common shareholders after appropriating to Bonus and Welfare Fund by the weighted-average number of common shares outstanding during the year.

Diluted earnings per share is calculated by dividing net income available to common shareholders (after adjusting dividends of preferred convertible shares) by the weighted-average number of common share outstanding and the weighted-average number to be issued in case where all dilutive potential common are converted into common shares.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the accounting period ended June 30, 2025

Unit: VND

26. Related parties

(i) Enterprises that control, or are controlled directly or indirectly through one or more intermediaries, or are under common control with the reporting enterprise (including parent companies, subsidiaries, subsidiaries of the same group);

(ii) Associate companies (stipulated in Accounting Standard No. 07 "Accounting for investments in associates");
(iii) Individuals with direct or indirect voting rights in reporting enterprises that lead to significant influence over these enterprises, including close family members of these individuals. Close family members of an individual are those who can control or be controlled by that person when dealing with a business such as: Father, mother, wife, husband, children, brothers, and sisters.

(iv) Key management employees have the rights and responsibilities for planning, managing and controlling the activities of the reporting enterprise, including leaders and management staff of the company and close family members of these individuals;

(v) Enterprises where the individuals mentioned in case (iii) or case (iv) directly or indirectly hold an important part of the voting rights or through this, that person has can have a significant impact on the business. This includes businesses that are owned by the directors or major shareholders of the reporting enterprise and businesses that share a key member of management with the reporting enterprise.

In considering each relationship between related parties, it is necessary to pay attention to the nature of the relationship, not just the legal form of those relationships.

27. Principles for presenting assets, revenue and operating results by segment

A reportable segment includes business segment or a geographical segment.

A business segment is a distinguishable component of an enterprise that is engaged in providing an individual product or service or a group of related products or services and that is subject to risks and returns that are different from those of other business segments.

A geographical segment is a distinguishable component of an enterprise that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

For the purpose of management, the Company operates in a large scale of the country, so it presents major segment reporting by business sector, the minor segment reporting by geographical segment.

Total	204.459.835.151	(25.000.000.000)	202.186.694.866	(17.500.000.000)

(1) The advance payment to Mr. Nguyen Khac Tai and Mr. Nguyen Duy Phong according to Decision No. 03C/2020/QD-HDQT dated March 20, 2020 and Decision No. 10A/2020/QD-HDQT dated September 10, 2020 on compensation payment for site clearance of the Dai Dong - Hoan Son II Industrial Park Infrastructure Investment and Business Project in Luong Village, Dai Dong Commune, Bac Ninh Province.

(2) The capital contribution is related to the investment cooperation contract No. 0907/2020/HDHTDT/SDN-SGU signed on July 9, 2020 between Saigon - Da Nang Investment JSC (SDN) and Saigon Urban Development and Investment JSC (SGU) on cooperation in investing in Bau Tram Social Housing Project. In which, SDN will contribute the land use rights of the project in Hai Van Ward, Da Nang City with an area of 40,587 m2 corresponding to the contributed capital of VND 86 billion, and SGU will contribute all the capital in cash necessary to implement the project but not less than VND 172 billion. Accordingly, the profit after tax that SGU will enjoy is the remaining amount after paying SDN 30% of the profit after corporate income tax of the project but not less than VND 86 billion.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the accounting period ended June 30, 2025

Unit: VND

(3) Investment entrusted to individuals under the following entrustment contracts:

- Investment entrustment contract No. 2606/2024/HDUTDT/SGT dated June 26, 2024 for Mr. Bui Xuan Quynh with a contract value of VND 52,831,417,540. The purpose of entrusting real estate investment in various forms. The profit from the use of assets formed from the entrusted capital will be divided according to the ratio: Saigon Telecommunication Technology Corporation receives 95%, Mr. Bui Xuan Quynh receives 5%. The entrustment contract has a term of 1 year from the date of signing and is automatically extended for another 01 year.

(4) Advance payment to Multimedia Corporation (VTC) to purchase technical equipment to establish a subsidiary under the Cooperation Contract to establish VTC-SaigonTel Communications JSC No. 10/HD-SGT dated November 11, 2010.

(5) Deposit for the principle contract No. 01/2024/HDNT/MS-SGU signed on October 29, 2024 between Minh Son Construction JSC ("Minh Son Company") and Saigon Urban Development and Investment JSC ("SGU Company") on cooperation in investing in the Residential Housing Construction Investment Project in Dien Ban Town, Quang Nam Province with an area of 59,237 m2 invested by Minh Son Company. SGU Company has the right to choose to purchase the Project to become a customer of Minh Son Company or transfer the purchase option to a legal entity or individual designated by SGU Company. Minh Son Company will sign a Project transfer contract with SGU Company to ensure compliance with the provisions of law after the Project is eligible to sign a sales contract.

(6) Other receivables related to the deposit contract for the future purchase of shares of the project enterprise of Saigon Post and Telecommunications JSC signed on October 5, 2018, and the attached appendices. The deposit period is from the date of signing the contract until October 5, 2024, and the contract is currently overdue.

	First 6 months of 2025 announced	First 6 months of 2024 audited
1. Revenue from sales and services rendered		
a. Revenue		
Revenue from trading and services	231.874.929.611	205.674.314.682
Revenue from trading real estates, leasing land, office and plant	816.704.390.334	155.164.427.537
Total	1.048.579.319.945	109.637.817.547

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the accounting period ended June 30, 2025

Unit: VND

b. Revenue from leasing assets

In the year, the Company recorded the income from leasing the land at Dai Dong Hoan Son Industrial Park in the consolidated income statement in compliance with the accounting policies presented in Notes IV.20. If the revenue from leasing is allocated in the leasing term, the income, profit before tax will be influenced as follows:

	First 6 months of 2025 announced	First 6 months of 2024 audited
b1. Recording revenue once		
Revenue	798.151.865.134	20.742.182.500
Profit before tax	525.896.636.773	16.691.243.141
b2. Recording by gradual allocation on leasing term		
Revenue	22.804.339.004	628.550.985
Profit before tax	15.025.618.194	505.795.247

The possibility of decline in profit and cash flows in the future resulting from the recognition of revenue on the entire amount received in advance:

According to the Company's assessment, the Company is unlikely to experience a decline in future profits and cash flows because it has already recognized revenue for the entire amount received in advance for the land lease agreement at Dai Dong Hoan Son Industrial Park, Dai Dong Commune, Bac Ninh province. As at the date of preparing the financial statements, the Company has collected 90% of the lease payments for this land lease agreement.

2. Cost of goods sold	First 6 months of 2025 announced	First 6 months of 2024 audited
Costs of trading and services	209.775.394.352	171.000.804.220

9.	Selling expenses	1.468.277.988	458.954.662	1.009.323.326	220%	(3)
10.	General & administration expenses	47.567.040.410	26.830.752.967	20.736.287.443	77%	(4)
11.	Operating profit	15.566.409.734	15.369.335.890	197.073.844	1%	
		-	-	-	0%	
12.	Other income	914.477.749	1.076.330.538	(161.852.789)	-15%	
13.	Other expenses	54.100.141	1.647.271.004	(1.593.170.863)	-97%	
14.	Other profit	860.377.608	(570.940.466)	1.431.318.074	0%	
15.	Net accounting profit before tax	16.426.787.342	14.798.395.424	1.628.391.918	11%	
		-	-	-	0%	
16.	Profit after tax of the parent company	10.453.075.228	480.380.201	9.972.695.027	2076%	
17.	Profit after tax of the non-controlling shareho	3.359.739.529	967.170.822	2.392.568.707	247%	
18.	Net profit after corporate income tax	2.613.972.585	13.350.844.401	(10.736.871.816)	-80%	(5)

Reasons for the profit after corporate income tax in the 2nd quarter of 2025:

- (1) - Revenue in Q2, 2025 decreased by 27%, equivalent to a decrease of VND 68.7 billion compared to the same period last year, mainly due to the revenue of Dai Dong Hoan Son Phase 2 Project of Bac Ninh Branch in Bac Ninh province which was completed and recorded in Q1/2025. And the same case with SGT's subsidiary, Urban Development and Investment Joint Stock Company, also completed the project and recorded revenue mainly in Q1/2025, so the unit's revenue in Q2/2025 decreased.
- (2) - Financial revenue in the second quarter of 2025 decreased by VND 35 billion, equivalent to an 82% decrease compared to the same period last year, because the parent company and its branches and subsidiaries are all focusing capital to implement projects on schedule.
- (3),(4) - It is necessary to focus resources and finances to implement the proposed 2025 business plan, so the parent company, branches and subsidiaries are flexible in sales policies and invest in digital transformation management systems, so the sales cost in the second quarter of 2025 increased by 1 billion VND, equivalent to an increase of 220% over the same period, and the management cost in the second quarter of 2025 increased by 77%, equivalent to an increase of 20 billion VND over the same period last year.
- (5) - The above reasons caused the profit after tax in the second quarter of 2025 to decrease by 80%, equivalent to a decrease of 10.7 billion VND compared to the same period in 2024.

17. Profit after tax of the non-controlling sharehol	3.138.268.049	201.578.733	2.936.689.316	1457%	
18. Net profit after corporate income tax	353.894.269.657	13.412.067.764	340.482.201.893	2539%	(4)

Reasons for the profit after corporate income tax of first 6 months of 2025:

- (1) - Similar to the content of the profit explanation in the Accumulated Separate Report for the first 6 months of 2025, due to the Dai Dong Hoan Son Phase 2 Project of Bac Ninh Branch in Bac Ninh province, impressive business results were achieved with Accumulated revenue for the first 6 months of 2025 increasing by 687 billion VND, equivalent to an increase of 191% over the same period in 2024. And Accumulated profit for the first 6 months of 2025 increased by 491 billion VND, equivalent to an increase of 624% over the same period in 2024.
- (2),(3) - Similar to the profit explanation in the Accumulated Separate Report for the first 6 months of 2025, Accumulated Other Income for the first 6 months of 2025 increased by more than 4 billion VND, equivalent to an increase of 290% compared to the same period in 2024 and at the same time Accumulated Other Expenses for the first 6 months of 2025 decreased by 10 billion VND, equivalent to an 80% decrease compared to the same period in 2024.
- (4) - The above reasons have caused the accumulated profit after tax in the first 6 months of 2025 to increase by 340 billion VND compared to the same period in 2024.
